

ORGHACKING

SOLVING HUMAN PUZZLES

Getting the most out of your AI intern

1. It's an intern, you don't let it do work on its own

2. Give it context and constraints

- Use natural language
- Utilize role and persona (“you are a _____”, “act as a “)
- Describe the output
- Try different prompt structure/sequence
- Make it more _____ / less _____
- Add constraints: write this in the style of ___, avoid ____, include ____
- Give it examples for the outcome that you're looking for: using the style of the paragraphs below, do _____

3. Give it feedback, and iterate

4. If you're not sure what context it needs... Just ask it!

5. Be mindful of where it may trip

6. Don't ask it to do things it shouldn't do
